### **DETAILED ACTION**

1. The following is an examiner's statement of reasons for allowance: Prior art (Kesterman et al.) teaches to have a transition piece comprising a tube having a connecting end, a clamp attached to the tube near the connecting end, a gasket mounted inside the tube near the connecting end, the transition piece is configured to connect to a pipe by fitting the pipe inside the connecting end and engaging the gasket around an outside wall of the pipe in a substantially airtight manner and the clamp is configured to tighten an outside wall of the tube to create a pressfit engagement between the tube and the pipe but does not teach that the transition piece is mounted in a combustion device and further wherein an exterior of the transition piece extends through the combustion device in a substantially air tight manner such that an interior portion of the combustion device is substantially sealed from ambient surroundings of the combustion device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
